

# Opening the Appetite: Data Skills for Global Development Careers Training Programme : WELCOME BRIEFING

**Welcome! This programme provides an accessible and relaxed introduction to the types of data skills most in demand in the global development sector – covering both practical data skills, such as data visualisation, and broader skills, such as how to effectively communicate findings. It is designed to *open your appetite* to the opportunities to use data skills in global development.**

There are three parts to the programme:

- **PART 1:** Online self-study course organised into modules to introduce key material, hosted on the UNED Abierta learning platform
- **PART 2:** Online live tutor-led whole group activities to extend and consolidate learning from self-study modules and support team building.
- **PART 3:** Team projects to apply your learning to real world scenarios whilst developing cross-cultural teamwork and communication skills.

The schedule for the training programme is shown in the table below. You will see that on days 1-4 there are modules to complete in the UNED Abeirta training programme (**PART 1**), then, at the end of each day, we will have a live online tutorial for the whole group. The tutorials will be a chance to reflect on the modules and ask any questions, as well as to get to know each other (**PART 2**). We will also start working on a data related team project during the tutorials (**PART 3**). Day 5 will be wholly dedicated to progressing, finishing and presenting the team projects.

DAY 1	DAY 2	DAY 3	DAY 4	DAY 5
