

BALSTON AGIUS

Experienced Landscape Architect/Project Manager with 2-5 years' experience – based in Wiltshire

Established in 1983, Balston Agius is experienced in all fields of design and management. We are principally focused on a wide range of privately owned projects in the UK, working both as designers and project managers, either as leader or as part of a multi-disciplinary consortium. Our philosophy subscribes to flexibility and the use of concentrated expertise when required.

Our main office is in Wiltshire but part of the team is also located in London. As a small company, we guarantee a personal service, being selective in the projects we take on in order to ensure that each individual job continually receives the closest attention.

We are seeking a competent and experienced Landscape Architect, preferably with 2-5 years' experience (Part 3 LI minimum) to join our friendly practice. The role will also involve a degree of project management, and will primarily be office based. The ideal requirements for the role are:

Qualifications

- BA (Hons) Degree in Landscape Architecture
- 2-5 years' working experience
- Clean driving licence

Key Technical Skills/Knowledge/Experience

- Be proficient in AutoCad, Sketch Up, Adobe Photoshop, InDesign and NBS Landscape software, and be willing to learn new packages such as KeySCAPE.
- Have a keen interest and knowledge of plants and planting.
- Be generally conversant in all stages of project development – from analysis through to design, to construction, implementation and management.
- Be experienced in the preparation of illustrated plans and visualisations, working drawings and details.
- Be experienced in the management of up to date drawing records and documents.

Personal Skills

- Be confident in liaising with other consultants and those working on site.
- Have an organised and efficient approach to completing work within tight and often unpredictable deadlines, working additional hours if necessary.
- Be adaptable to working independently and under direction, whilst also working with other individuals within the team.
