

Landscape Technician

Black and Veatch is an employee owned multi-disciplinary consulting and Construction Company, with over 100 offices worldwide. We specialise in major infrastructure projects, with a focus in the UK on water infrastructure.

We are looking for a Landscape Technician to assist our busy landscape team, based in our Chester office. Ideally you will have a post-graduate diploma or Masters in Landscape Architecture but other disciplines will be considered. The successful candidate will have strong CAD skills and be proficient in the use of other graphics packages such as GIS, Indesign, Illustrator and Photoshop. An interest in ecological design and landscape assessment is essential. Good freehand drawing and report writing skills are desirable.

Most importantly you will be a strong and enthusiastic team player, keen to work in our friendly multi-discipline environment. Projects tend to be large scale, often starting with an LVIA and continuing through to Masterplanning, detailed design and operations on site. We offer opportunities for career growth and will support P2C candidates.

Please e-mail your CV and three A3 examples of your work to watsonj@bv.com . For an informal discussion please call Jan Watson or Mark Boothroyd on 01244 304100
