### **Graduate Landscape Architect**

Established in 1984, Portus and Whitton (P+W) are a busy, design led practice based in the Cotswolds. We work on a variety of landscape projects and have considerable experience of historically and architecturally sensitive design projects. Our work also includes Landscape Impact Assessments; Planning Inquiries; higher education projects; health and housing; landscape management plans; masterplanning major developments and tourism related work in the countryside. We frequently work as part of multi-disciplinary teams, consulting with public authorities and government agencies.

The practice is now seeking a talented Graduate Landscape Architect at our Cirencester office.

The successful candidate will be articulate and able to demonstrate well-developed technical and professional skills. They will have working experience with CAD (Vectorworks preferred) and 3D/graphics packages and be self-motivated. They must have well developed design, visualisation and communication skills; excellent report writing and a clear commitment to professional development. They must also have a full driving licence. We are happy to mentor the graduate landscape candidate through P2C and equally, the successful candidate will play a role in developing the business and future expansion. Previous employment experience is helpful but not essential.

In return, we will offer a competitive salary, flexible working arrangements, career progression and the benefit of working in a beautiful part of England.

Expressions of interest should be addressed to Jan Ashworth at [contact@portusandwhitton.co.uk](mailto:contact@portusandwhitton.co.uk) enclosing a full CV and portfolio of work examples.
