Ecology and Landscape

18th November 2014

Landscape Architect

Job Description:

This role will be full time and based in Salwayash, near Bridport in Dorset. The successful applicant will be actively engaged in planning and designing the development and construction of external land areas such as renewable energy parks and residential, industrial and commercial sites.

You will also be working closely with the in house Planning, Energy and Ecology teams, reporting to and line managed by the Directors.

The role will include leading, co-ordinating and managing the landscape aspects of planning applications predominantly for large scale renewable energy projects. Experience, knowledge and competency for this type of project is desirable.

In a typical project the following areas of work are likely to be required and knowledge and experience of these is therefore essential:

- Surveying sites
- Discussing requirements with clients
- Creating plans, designs and drawings
- Using computer-aided design
- Using GIS/GPS based systems
- Presenting proposals to clients for approval and agreeing time-scales
- Overseeing projects as they progress
- Liaising with other professionals such as architects, surveyors, town planners and civil engineers
- Input into Environmental Statements
- Input into EIA screening/full EIA reporting
- Public consultation
- Liaising with landowners
- Writing technical reports/LVIA/ZVIs
- Planning strategies and options
- Representation of the Planning Applications at committees and hearings
- Business Development
- Management reporting
- Sub-contracting certain tasks with consultants, ensuring best value for any sub contracted work.

Salary guide: £30,000 - £35,000 dependent upon experience

Holiday: 25 days per year plus bank holidays
