

WE'RE HIRING

We are looking for motivated postgraduates to assist us in our Newcastle, Edinburgh and Bristol offices

You will have a natural ability to conceptualise and visualise your design ideas through hand drawn and digital media as well as an excellent working knowledge of graphic presentation packages such as Photoshop, SketchUp, InDesign and AutoCAD. Good communication, report writing skills, proficiency in Microsoft Office applications and a working knowledge of GIS / Revit would be desirable.

SLR's landscape section works across a wide range of business sectors and has achieved more than 25 national and international awards for excellence. The successful candidate will gain experience in our specialist services which include education, public realm design, residential masterplanning and environmental impact assessment.

Our approach is meticulous, and frequently takes advantage of the latest technology such as interactive 4D graphics to visualise design options and how a scheme may be phased, or GIS and BIM technology to help sift through constraints and opportunities enabling these to be creatively assimilated around a development.

We offer a comprehensive remuneration package and a structured career path and welcome applications from ambitious individuals. The successful candidate will expect to develop their career through actively contributing to SLR's award-winning portfolio. The team has a diverse range of projects and can provide opportunities to work alongside several of the UK's leading experts.

What to submit - email your CV and Portfolio as a PDF (max 15mb) to Bridget Anderson: banderson@slrconsulting.com

Closing date for applicants - 2nd May 2014
