

Inclusive Design, a Lasting Paralympic Legacy

Julie Fleck, Built Environment Professional Education Project Office for Disability Issues

Using the experience of London 2012 - which delivered 'the most accessible Olympic and Paralympic Games in history' - Julie Fleck will talk about why inclusive design is important, how an inclusive environment is being achieved today in Queen Elizabeth Olympic Park, how the government's aim to embed inclusive design skills and knowledge into built environment professional education and training and what you as a landscape architect can do in your professional life to make inclusive design business as usual all you

Free Public Lecture
Tuesday 08 March 2016

18:45, Room TC001 (FCH Campus)
University of Gloucestershire, Cheltenham
