

Time, Medium and Message: Strategies for Landscape Representation

Dr. Paul Cureton

The variety of design tools and emerging technologies available for landscape representation enables new techniques, data and accounts of time based aspects, which arguably reduce the unknown of landscape character. These new innovations from Drones to Digital Fabrication and the re-presentation of landscape will be critically evaluated for future landscapes.

Paul Cureton is a landscape architect and Senior Lecturer in Design Software Skills and Innovation at the University of Hertfordshire..

Free Public Lecture
Tuesday 21 February 2017

18:45, Room TC001 (FCH Campus)
University of Gloucestershire, Cheltenham

INNOVATION FOR SUSTAINABLE LIVING

The Sustainable Landscape Series, founded by Robin Snowdon and generously sponsored by Arup Landscape & LISW, is a free public lecture series exploring issues of sustainability, sustainable development and sustainable living.

The series aims to explore various innovative approaches and themes connected with the creation of landscapes to enhance the health and wellbeing of both people and planet.

For more info contact Dr. David Buck: dbuck@glos.ac.uk or go to gloscape.com
