WORKING IN PARTNERSHIP

REGIONAL CENTRE OF EXPERTISE  
ON EDUCATION FOR  
SUSTAINABLE DEVELOPMENT

ACKNOWLEDGED BY

UNITED NATIONS  
UNIVERSITY

## About our community partnership

This event is a partnership between the University of Gloucestershire and Gloucester Cathedral as part of our shared interest in taking action for the Global Goals. It's co-ordinated through RCE Severn – a UN recognised sustainability education network, hosted by the University of Gloucestershire.

The University of Gloucestershire is the most sustainable University in the UK (People and Planet league 2019). Gloucester Cathedral is improving its environmental and community impact as part of its commitment to social justice and to ensure it remains open and relevant for generations to come.

## About Live Smart

The Live Smart student-led programme connects big sustainability issues the world is facing for the future with the concerns our students have right now. Its core aims are to help students boost their wellbeing, save money and feel connected to their local community whilst benefitting the planet. One element of Live Smart is the Community Challenge which gives students the opportunity to gain recognition and win prizes by working individually or teams with local community groups to take action for the global sustainable development goals. These challenges will be celebrated and showcased as part of the Festival.
